

RENAN SILVA

Senior Full Stack Software Engineer

Brazil • renansilvaufg@gmail.com • [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 6+ years of experience designing and delivering enterprise SaaS platforms across healthcare, banking, and real estate. Experienced in distributed systems, microservices, event-driven architectures, .NET, Node.js, React, AWS, SQL/NoSQL databases, REST APIs, and CI/CD.

CORE TECHNOLOGIES

- **Backend:** C#, .NET 8, ASP.NET Core, Node.js, Dapper, Entity Framework Core, MediatR, REST APIs, CQRS
- **Frontend:** React, Next.js, Vue.js, TypeScript, Material UI, i18n
- **Databases:** SQL Server, MySQL/MariaDB, MongoDB
- **Cloud & DevOps:** AWS, Docker, SQS, Lambda, EventBridge, ECS, Terraform, GitLab CI/CD
- **AI-Assisted Development:** Claude Code (custom workflows, skills & commands), GitHub Copilot
- **Observability & Security:** OpenTelemetry, Datadog, Serilog, Auth0, SonarQube
- **Testing:** xUnit, FluentAssertions, Moq, Integration Testing, Testcontainers, Playwright, Vitest

PROFESSIONAL EXPERIENCE

Mission.dev | Senior Software Engineer | Nov 2023 – Present

- Design and build backend microservices using .NET 8, ASP.NET Core, Dapper, MySQL/MariaDB, and MongoDB, including REST APIs, CQRS/MediatR, and asynchronous processing workflows.
- Own end-to-end delivery of features across database schemas, backend services, APIs, and React/Next.js applications.
- Build event-driven background services for claims processing, payment workflows, card activation, and document generation using AWS SQS, Lambda, and EventBridge.
- Manage containerized workloads and cloud infrastructure using ECS and Terraform.
- Implement inter-service communication through internal APIs and versioned service contracts while improving reliability and observability using OpenTelemetry, Datadog, Serilog, Docker, and GitLab CI/CD.

Stefanini Group | Full Stack Developer | Oct 2022 – Nov 2023

- Developed enterprise banking applications for Banco do Brasil using .NET 5, ASP.NET Core, Entity Framework, SQL Server, Vue.js, and Pinia.
- Built REST APIs and designed new features while improving application performance and maintainability.
- Performed code reviews, mentored junior developers, and managed deployments and CI/CD pipelines using Azure DevOps.

Adão Imóveis | Frontend Developer | Mar 2022 – Oct 2022

- Developed responsive customer-facing applications using React and Next.js, including map-based property search for desktop and mobile.
- Built reusable UI components from Figma designs and integrated REST APIs for dynamic property listings and search.
- Collaborated through Agile practices, code reviews, and pair programming.

SEID | Full Stack Developer | Jan 2021 – Mar 2022

- Developed an internal academic management platform using Node.js and React, building REST APIs following DDD and Clean Architecture principles.
- Developed frontend features with React, Next.js, and PrimeReact across student, teacher, course, and grade management modules.

EDUCATION

Postgraduate Degree in Software Architecture — Anhanguera Educacional

Bachelor's Degree in Mechanical Engineering — Federal University of Goiás

Languages

- **English** – Fluent
- **Portuguese** – Native

Certifications

- AWS Cloud Quest: Cloud Practitioner
- Microsoft Foundational C#
- Scrum Foundation Professional
